

# Magic Math Machine

1. Start with a two quart milk or juice carton.

2. Open it at the top and cover the carton with contact paper.

3. Use a razor blade to cut out two rectangles as shown.

4. Place a 3 1/2" x 12" strip of poster board inside the carton.

5. Staple poster board strip inside the top of the carton. Use several staples to close the carton tightly. Use a small piece of contact paper to cover the staples.

6. Tape the poster board strip to the bottom of the carton with about an inch of posterboard sticking out.

7. Write math problems on 2 1/2" x 2" cardstock cards. Flip card over and write the answer on the back. Put the problem in the top.

8. The answer comes out the bottom.
