

Assembly Instructions:

1. I have created each piece on a different page so that you can print these pieces on 3 different coloured card board sheets.
2. Cut out the 2 wheels, the window bar and the 2 squares in the window bar.
3. Laminate all these parts.
4. Pierce the grey dots and use a brad to hold the 3 pieces together with the large wheel at the bottom, the smaller wheel on top and the window bar on the very top.
5. Let your child turn the centre wheel to the number table he/she is currently learning.
6. Let them now turn the big outer number wheel to practice the tables with each number.

Centre Tables Wheel
